

---

Answer TWO questions

*Read carefully the instructions on the answer book and make sure that the particulars are entered on it. All questions carry equal weight.*

*Candidates are reminded that their answers should be directed to the questions asked. Marks will not be awarded for irrelevant or tangential material. Candidates should not use substantially the same material in answering different questions.*

---

1     What do one-year-old humans know of others' beliefs?

---

2     Do we need a notion of innateness in order to explain how humans come to know about objects, causes, words, numbers, colours, actions or minds? (Your answer may focus on a single domain of knowledge.)

---

3     How do children learn the meanings of words?

---

4     What do findings about nonverbal communication in infancy reveal about how abilities to communicate with language are acquired?

---

5     What is puzzling about when humans can first represent unperceived objects? How can the puzzle be resolved?

---

6     What is shared intentionality?

---
